

Technology Centre

This school is situated in rural area where access to technology learning is not available. This technology centre will pave way for student's learning in the school to develop new skills and understand the information through technology to hence their knowledge and compete with the modern world.

We have a technology Centre

Some message from the students at Iruducholaimadu Vishnu Vidiyalayam

Shiyalini is 12 years and studying in grade 7. She says, "I am happy to have this centre at our school. I want to become a doctor and this technology centre will help me in learning and to do research to advance my knowledge. We will also communicate though internet in order to collect information. Thanks to Child Fund New Zealand the good people who finance this. My thanks goes to VDO and Child Fund Sri Lanka.

S.Devadas is 15 years old and is studying in grade 10. When he was explaining his feeling about the Technology centre, he said "This is a blessing to have the modern communication set up in his school. I have undergone the basic training to use this, which I never thought I will get at my village. We will make sure that we make complete use of these equipment in our learning and research. I thank the instructors for giving this knowledge, Our BIG thanks goes to the loving people in New Zealand for proving the money for this and VDO for this Technology centre".

**Thank you
CFSL and CFNZ**
